

# **MT7988A**

## **Wi-Fi 7 Generation Router**

### **Platform: Registers Part 2**

**Open Version**

**Part 1: Chapter 1 – Chapter 3**

**Part 2: Chapter 4**

**Version: 0.1**

**Release Date: 2023-10-18**

Use of this document and any information contained therein is subject to the terms and conditions set forth in Exhibit 1.

## 4 Connectivity

### 4.1 NETSYS

#### 4.1.1 Register Definition

Module name: ETHDMASYS\_SYSCTL Base address: (+0x1500\_0000)

| Address  | Name                      | Width | Register Function                           |
|----------|---------------------------|-------|---------------------------------------------|
| 1500000C | <u>REVISION_ID</u>        | 32    | ETHSYS revision identification              |
| 15000010 | <u>SYSCFG0</u>            | 32    | System configuration register 0             |
| 15000014 | <u>SYSCFG1</u>            | 32    | System configuration register 1             |
| 15000018 | <u>TESTSTAT0</u>          | 32    | Firmware test status 0                      |
| 1500001C | <u>TESTSTAT1</u>          | 32    | Firmware test status 1                      |
| 15000024 | <u>BOOT_RELEASE</u>       | 32    | Release CPU's command to boot from SRAM     |
| 1500002C | <u>CLKCFG0</u>            | 32    | Clock configuration register 0              |
| 15000030 | <u>CLKCFG1</u>            | 32    | Clock configuration register 1              |
| 15000034 | <u>RSTCTL</u>             | 32    | Reset control register                      |
| 15000038 | <u>RSTSTAT</u>            | 32    | Reset status register                       |
| 15000040 | <u>GPIO0_MODE</u>         | 32    | GPIO0 purpose selection                     |
| 15000044 | <u>GPIO1_MODE</u>         | 32    | GPIO1 purpose selection                     |
| 15000048 | <u>MEMO0</u>              | 32    | Memory0                                     |
| 1500004C | <u>MEMO1</u>              | 32    | Memory1                                     |
| 15000050 | <u>MEMO2</u>              | 32    | Memory2                                     |
| 15000054 | <u>MEMO3</u>              | 32    | Memory3                                     |
| 15000058 | <u>MEMO4</u>              | 32    | Memory4                                     |
| 1500005C | <u>MEMO5</u>              | 32    | Memory5                                     |
| 15000060 | <u>IOC_EN</u>             | 32    | NETSYS IO coherence enable register         |
| 15000064 | <u>BIST_CTRL</u>          | 32    | NETSYS Global BIST configuration register   |
| 15000068 | <u>BIST_NETSYS2EMI0</u>   | 32    | NETSYS2EMI_M0 BIST configuration register 0 |
| 1500006C | <u>BIST_NETSYS2EMI1</u>   | 32    | NETSYS2EMI_M0 BIST configuration register 1 |
| 15000070 | <u>BIST_NETSYS2EMI2</u>   | 32    | NETSYS2EMI_M1 BIST configuration register 0 |
| 15000074 | <u>BIST_NETSYS2EMI3</u>   | 32    | NETSYS2EMI_M1 BIST configuration register 1 |
| 15000078 | <u>BIST_NETSYS2INFRA0</u> | 32    | NETSYS2INFRA BIST configuration register 0  |
| 1500007C | <u>BIST_NETSYS2INFRA1</u> | 32    | NETSYS2INFRA BIST configuration register 1  |
| 15000080 | <u>AXICFG0</u>            | 32    | AXI sideband configuration register 0       |
| 15000084 | <u>AXICFG1</u>            | 32    | AXI sideband configuration register 1       |
| 15000088 | <u>GALSCFG0</u>           | 32    | GALS configuration register 0               |
| 1500008C | <u>GALSCFG1</u>           | 32    | GALS configuration register 1               |
| 15000090 | <u>MISTAT</u>             | 32    | NETSYS bus MI status register               |
| 15000094 | <u>SI0STAT0</u>           | 32    | NETSYS bus SI status register 0             |
| 15000098 | <u>SI0STAT1</u>           | 32    | NETSYS bus SI status register 1             |
| 1500009C | <u>SI0STAT2</u>           | 32    | NETSYS bus SI status register 2             |
| 150000A0 | <u>S2PSTAT0</u>           | 32    | NETSYS bus S2P status register 0            |
| 150000A4 | <u>S2PSTAT1</u>           | 32    | NETSYS bus S2P status register 1            |
| 150000A8 | <u>X2SSTAT0</u>           | 32    | NETSYS bus X2S status register 0            |
| 150000AC | <u>X2SSTAT1</u>           | 32    | NETSYS bus X2S status register 1            |
| 150000B0 | <u>R2XCFG0</u>            | 32    | R2X configuration register 0                |
| 150000B4 | <u>R2XCFG1</u>            | 32    | R2X configuration register 1                |

| Address  | Name                           | Width | Register Function                           |
|----------|--------------------------------|-------|---------------------------------------------|
| 150000B8 | <b><u>R2XSTAT0</u></b>         | 32    | R2X status register 0                       |
| 150000BC | <b><u>R2XSTAT1</u></b>         | 32    | R2X status register 1                       |
| 150000C0 | <b><u>APBCFG</u></b>           | 32    | NETSYS_APB configuration register           |
| 150000C4 | <b><u>APBSTAT</u></b>          | 32    | NETSYS_APB status register                  |
| 15000150 | <b><u>BIST_NETSYS2EMI4</u></b> | 32    | NETSYS2EMI_M2 BIST configuration register 0 |
| 15000154 | <b><u>BIST_NETSYS2EMI5</u></b> | 32    | NETSYS2EMI_M2 BIST configuration register 1 |
| 15000180 | <b><u>GALSCFG2</u></b>         | 32    | GALS configuration register 2               |
